

Dear Parents

As a school we have used our Year 6 class to trial Mathletics, a multi-award winning maths learning resource that encourages students and rewards their effort. The Year 6 children have been keen to complete the tasks on this and the leadership team can see the benefits of the whole school using it to revise Mathematical knowledge. We have subscribed to this for the next year.

Your child can sign into the site (www.mathletics.com) using log in details that they have been given; young children will have these in their reading record books. The children can complete homework and assessment tasks online and can play some fun games on Mathletics live. They are able to compete against children in the class by collecting reward points and in turn building up credits for award certificates. Attached is a letter from Mathletics with more detail.

I urge you to take the time to look and explore the site with your child. If you have any questions or comments please feel free to ask, as we wish to maximize this resource.

Please don't worry if your child doesn't have access to a computer or tablet at home; they can use the laptops at school during lunch break as an alternative.

Thank you for our support.

Regards

Karen Dyson

Maths Leader
