

Platt C.E Primary School

Supporting Pupils with Medical Conditions Policy

This policy is written in line with the requirements of: -

Children and Families Act 2014 - section 100

Supporting pupils at school with medical conditions: statutory guidance for governing bodies of maintained schools and proprietors of academies in England, DfE Dec 2015

0-25 SEND Code of Practice, DfE 2015

Mental Health and behaviour in schools: departmental advice for school staff, DfE 2018

Equalities Act 2010

Schools Admissions Code, DfE 1 Feb 2021

This policy should be read in conjunction with the following school policies - SEN Policy, Safeguarding Policy, Off-site visits Policy, Complaints Policy

This policy was developed with representatives from the governing body, healthcare professionals and parent teacher association representatives and will be reviewed annually.

Definitions of medical Conditions

Pupils' medical needs may be broadly summarised as being of two types: -

Short-term affecting their participation at school because they are on a course of medication.

Long-term potentially limiting access to education and requiring on-going support, medicines or care while at school to help them to manage their condition and keep them well, including monitoring and intervention in emergency circumstances. It is important that parents feel confident that the school will provide effective support for their child's medical condition and that pupil's feel safe.

Some children with medical conditions may be considered disabled. Where this is the case governing bodies **must** comply with their duties under the Equality Act 2010. Some may also have special educational needs (SEN) and may have a statement or Education, Health and Care Plan (EHCP). Where this is the case this policy should be read in conjunction with the 0-25 SEND Code of Practice and the school's SEN policy / SEN Information Report and the individual healthcare plan will become part of the EHCP.

The statutory duty of the governing body

The governing body remains legally responsible and accountable for fulfilling their statutory duty for supporting pupils at school with medical conditions. The governing body of Platt CE Primary School fulfil this by:-

- Ensuring that arrangements are in place to support pupils with medical conditions. In doing so we will ensure that such children can access and enjoy the same opportunities at school as any other child;
- Taking into account that many medical conditions that require support at school will affect quality of life and may be life-threatening. Some will be more obvious than others and therefore the focus is on the needs of each individual child and how their medical condition impacts on their school life;
- Ensuring that the arrangements give parents and pupils confidence in the school's ability to provide effective support for medical conditions. These should show an understanding of how medical conditions impact on a child's ability to learn, as well as increase their confidence and promote self-care. We will ensure that staff are properly trained to provide the support that pupils need;
- Ensuring that no child with a medical condition is denied admission, or prevented from taking up a place in school because arrangements for their medical condition have not been made. However, in line with safeguarding duties, we will ensure that pupils' health is not put at unnecessary risk from, for example, infectious diseases, and reserve the right to refuse admittance to a child at times where it would be detrimental to the health of that child or others to do so;
- Ensuring that the arrangements put in place are sufficient to meet our statutory duties and ensure that policies, plans, procedures and systems are properly and effectively implemented;
- Developing a policy for supporting pupils with medical conditions that is reviewed regularly and accessible to parents and school staff (this policy);
- Ensuring that the policy includes details on how the policy will be implemented effectively, including a named person who has overall responsibility for policy implementation (see section below on policy implementation);
- Ensuring that the policy sets out the procedures to be followed whenever the school is notified that a pupil has a medical condition (see section below on procedure to be followed when notification is received that a pupil has a medical condition);
- Ensuring that the policy covers the role of individual healthcare plans, and who is responsible for their development, in supporting pupils at school with medical conditions (see section below on individual healthcare plans);
- Ensuring that the school policy clearly identifies the roles and responsibilities of all those involved in arrangements for supporting pupils at school with medical conditions and how they will be supported, how their training needs will be assessed

and how and by whom training will be commissioned and provided (see section below on staff training and support);

- Ensuring that the school policy covers arrangements for children who are competent to manage their own health needs and medicines (see section below on the child's role in managing their own medical needs);
- Ensuring that the policy is clear about the procedures to be followed for managing medicines including the completion of written records (see section below on managing medicines on school premises);
- Ensuring that the policy sets out what should happen in an emergency situation (see section below on emergency procedures);
- Ensuring that the arrangements are clear and unambiguous about the need to support actively pupils with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them from doing so (see section on day trips, residential trips and sporting activities);
- Depending on the child's medical condition, consider whether to
 - develop transport healthcare plans in conjunction with the LA for pupils with life-threatening conditions who use home-to-school transport
 - Purchase and train staff in the use of defibrillators
- Ensuring that the policy is explicit about what practice is not acceptable (see section on unacceptable practice);
- Ensuring that the appropriate level of insurance is in place and appropriate to the level of risk (see section on Liability and Indemnity);
- Ensuring that the policy sets out how complaints may be made and will be handled concerning the support to pupils with medical conditions (see section on complaints).

Policy implementation

The statutory duty for making arrangements for supporting pupils at school with medical conditions rests with the Governing Body. The governing body have conferred the following functions of the implementation of this policy to the staff below, however, the governing body remains legally responsible and accountable for fulfilling our statutory duty.

The overall responsibility for the implementation of this policy is given to the Headteacher. The Headteacher will also be responsible for ensuring that sufficient staff are suitably trained and will ensure cover arrangements in cases of staff absences or staff turnover to ensure that someone is always available and on-site with an appropriate level of training.

Class teachers will be responsible for preparing risk assessments for school visits and other school activities outside of the normal timetable. SLT/admin staff will be responsible for briefing supply teachers. Jackie Hallett is responsible for the monitoring of individual healthcare plans.

Jackie Hallett will be responsible in conjunction with parents/carers, for drawing up, implementing and keeping under review the individual healthcare plan for each pupil and making sure relevant staff are aware of these plans

All members of staff are expected to show a commitment and awareness of children's medical conditions and the expectations of this policy. All new members of staff will be inducted into the arrangements and guidelines in this policy upon taking up their post by their Induction Lead.

Procedure to be followed when notification is received that a pupil has a medical condition

This covers notification prior to admission, procedures to cover transitional arrangements between schools or alternative providers, and the process to be followed upon reintegration after a period of absence or when pupils' needs change. For children being admitted to Platt CE Primary School for the first time with good notification given, the arrangements will be in place for the start of the relevant school term. In other cases, such as a new diagnosis or a child moving to Platt CE Primary School mid-term, we will make every effort to ensure that arrangements are put in place within two weeks.

In making the arrangements, we will take into account that many of the medical conditions that require support at school will affect quality of life and may be life-threatening. We also acknowledge that some may be more obvious than others. We will therefore ensure that the focus is on the needs of each individual child and how their medical condition impacts on their school life. We aim to ensure that parents/carers and pupils can have confidence in our ability to provide effective support for medical conditions in school, so the arrangements will show an understanding of how medical conditions impact on the child's ability to learn, as well as increase their confidence and promote self-care.

We will ensure that staff are properly trained and supervised to support pupils' medical conditions and will be clear and unambiguous about the need to support actively pupils with medical conditions to participate in school trips and visits, or in sporting activities, and not prevent them in doing so. We will make arrangements for the inclusion of pupils in such activities with any adjustments as required unless evidence from a clinician such as a GP states that this is not possible. We will make sure that no child with a medical condition is denied admission or prevented from attending the school because arrangements for supporting their medical condition have not been made. However, in line with our safeguarding duties, we will ensure that all pupils' health is not put at unnecessary risk from, for example infectious disease. We will therefore not accept a child in school at times where it would be detrimental to the health of that child or others.

Platt CE Primary School does not have to wait for a formal diagnosis before providing support to pupils. In cases where a pupil's medical condition is unclear, or where there is a difference of opinion, judgements will be needed about what support to provide based on available evidence. This would normally involve some form of medical evidence and consultation with parents/carers. Where evidence conflicts, some degree of challenge may be necessary to ensure that the right support can be put in place. These discussions will be led by the Headteacher, and following these discussion an individual healthcare plan will written in conjunction with the parent/carers by the SENCO, and be put in place.

Individual healthcare plans

Individual healthcare plans will help to ensure that Platt CE Primary School effectively supports pupils with medical conditions. They will provide clarity about what needs to be done, when and by whom. They will often be essential, such as in cases where conditions fluctuate or where there is a high risk that emergency intervention will be needed. They are likely to be helpful in the majority of other cases too, especially where medical conditions are long-term and complex. However, not all children will require one. The school, healthcare professional and parent/carer should agree, based on evidence, when a healthcare plan would be inappropriate or disproportionate. If consensus cannot be reached the Headteacher, is best placed to take a final view. A flow chart for identifying and agreeing the support a child needs and developing an individual healthcare plan is provided at annex A.

Individual healthcare plans will be easily accessible to all who need to refer to them, while preserving confidentiality. Plans will capture the key information and actions that are required to support the child effectively. The level of detail within the plan will depend on the complexity of the child's condition and the degree of support needed. This is important because different children with the same health condition may require very different support. Where a child has SEN but does not have a statement of EHC plan, their special educational needs should be mentioned in their individual healthcare plan.

Individual healthcare plans (and their review) should be drawn up in partnership between the school, parents/carers and a relevant healthcare professional e.g. school, specialist or children's community nurse, who can best advise on the particular needs of the child. Pupils should also be involved whenever appropriate. The aim should be to capture the steps which Platt CE Primary School should take to help manage their condition and overcome any potential barriers to getting the most from their education. Parents/Carers will take the lead in writing the plan, but responsibility for ensuring it is finalised and implemented rests with the school.

Platt CE Primary School will ensure that individual healthcare plans are reviewed at least annually or earlier if evidence is presented that the child's needs have changed. They will be developed and reviewed with the child's best interests in mind and ensure that Platt CE Primary School assesses and manages risks to the child's education, health and social wellbeing, and minimises disruption. Where a child is returning to school following a period of hospital education or alternative provision, we will work with the local authority and education provider to ensure that the individual healthcare plan identifies the support the child will need to reintegrate effectively.

Form 1 provides a basic template for the individual healthcare plan, and although this format may be varied to suit the specific needs of each pupil, they should all include the following information

- The medical condition, its triggers, signs, symptoms and treatments;
- The pupil's resulting needs, including medication (dose, side effects and storage) and other treatments, time, facilities, equipment, testing, access to food and drink where this is used to manage their condition, dietary requirements and environmental issues e.g. crowded corridors, travel time between lessons;

- Specific support for the pupil's educational, social and emotional needs - for example, how absences will be managed, requirements for extra time to complete exams, use of rest periods or additional support in catching up with lessons, counselling sessions;
- The level of support needed (some children will be able to take responsibility for their own health needs) including in emergencies. If a child is self-managing their medication, this should be clearly stated with appropriate arrangements for monitoring;
- Who will provide this support, their training needs, expectations of their role and confirmation of proficiency to provide support for the child's medical condition from a healthcare professional; and cover arrangements for when they are unavailable;
- Who in the school needs to be aware of the child's condition and the support required;
- Arrangements for written permission from parents/carer and the Headteacher, for medication to be administered by a member of staff, or self-administered by the pupil during school hours;
- Separate arrangements or procedures required for school trips or other school activities outside of the normal school timetable that will ensure the child can participate e.g., risk assessment;
- Where confidentiality issues are raised by the parent/child, the designated individual to be entrusted with information about the child's condition; and
- What to do in an emergency, including whom to contact, and contingency arrangements. Some children may have an emergency healthcare plan prepared by their lead clinician that could be used to inform development of their individual healthcare plan

Roles and responsibilities

Please refer to the section on policy implementation for the functions that have been delegated to different, named members of staff at Platt CE Primary School.

In addition, we can refer to the **Community Nursing Team** for support with drawing up Individual Healthcare Plans, provide or commission specialist medical training, liaison with lead clinicians and advice or support in relation to pupils with medical conditions.

Other **healthcare professionals, including GPs and Paediatricians** should notify the Community Nursing Team when a child has been identified as having a medical condition that will require support at school. Specialist local health teams may be able to provide support, and training to staff, for children with particular conditions (e.g. asthma, diabetes, epilepsy).

Pupils with medical conditions will often be best placed to provide information about how their condition affects them. They should be fully involved in discussions about their medical support needs and contribute as much as possible to the development of, and comply with, their

individual healthcare plan. Other pupils will often be sensitive to the needs of those with medical conditions, and can, for example, alert staff to the deteriorating condition or emergency need of pupils with medical conditions.

Parents/carers should provide the school with sufficient and up-to-date information about their child's medical needs. They may in some cases be the first to notify the school that their child has a medical condition. Parents are key partners and should be involved in the development and review of their child's individual healthcare plan, and may be involved in its drafting. They should carry out any action they have agreed to as part of its implementation, e.g. provide medicines and equipment and ensure they or another nominated adult are contactable at all times.

Local authorities are commissioners of school nurses for maintained schools and academies in Kent. Under Section 10 of the Children Act 2004, they have a duty to promote co-operation between relevant partners such as governing bodies of maintained schools, proprietors of academies, clinical commissioning groups and NHS England, with a view to improving the well-being of children with regard to their physical and mental health, and their education, training and recreation. KCC is currently consulting on the re-organisation of its Health Needs provision which will strengthen its ability to provide support, advice and guidance, including suitable training for school staff, to ensure that the support specified within individual healthcare plans can be delivered effectively. KCC will work with us to support pupils with medical conditions to attend full time. Where pupils would not receive a suitable education in a mainstream school because of their health needs, the local authority has a duty to make other arrangements. Statutory guidance for local authorities sets out that they should be ready to make arrangements under this duty when it is clear that a child will be away from school for 15 days or more because of health needs (whether consecutive or cumulative across the year).

Providers of health services should co-operate with schools that are supporting children with medical conditions. They can provide valuable support, information, advice and guidance to schools, and their staff, to support children with medical conditions at school.

Clinical commissioning groups (CCGs) commission other healthcare professionals such as specialist nurses. They have a reciprocal duty to co-operate under Section 10 of the Children Act 2004 (as described above for local authorities). The local Health and Well-being Board provides a forum for the local authority and CCGs to consider with other partners, including locally elected representatives, how to strengthen links between education, health and care settings.

The **Ofsted** inspection framework places a clear emphasis on meeting the needs of disabled children and pupils with SEN, and considering the quality of teaching and the progress made by these pupils. Inspectors are already briefed to consider the needs of pupils with chronic or long-term medical conditions alongside these groups and to report on how well their needs are being met. Schools are expected to have a policy dealing with medical needs and to be able to demonstrate that it is being implemented effectively.

Staff training and support

See appendix 1

A healthcare professional qualified to do so will train all staff who are required to provide support to pupils for medical conditions. The healthcare professional will identify the training need during the development or review of the individual healthcare plan. We may choose to arrange training ourselves and will ensure that it remains up-to-date.

Training should be sufficient to ensure that staff are competent and have confidence in their ability to support pupils with medical conditions, and to fulfil the requirements set out in the individual healthcare plans. They will need an understanding of the specific medical conditions they are being asked to deal with, their implications and preventative measures.

Staff must not give prescription medicines or undertake healthcare procedures without appropriate training (updated to reflect any individual healthcare plans). A first aid certificate does not constitute appropriate training in supporting children with medical conditions. Healthcare professionals, including the school nurse, can provide confirmation of proficiency of staff in a medical procedure, or in providing medication (see Appendix 1).

All staff will receive induction training and regular whole school awareness training so that all staff are aware of the school's policy for supporting pupils with medical conditions and their role in implementing the policy. The Headteacher will seek advice from relevant healthcare professions about training needs, including preventative and emergency measures so that staff can recognise and act quickly when a problem occurs.

The family of a child will often be key in providing relevant information to school staff about how their child's needs can be met, and parents will be asked for their views. They should provide specific advice, but should not be the sole trainer.

The children's role in managing their own medical needs

If, after discussion with the parent/carer, it is agreed that the child is competent to manage his/her own medication and procedures, s/he will be encouraged to do so. This will be reflected in the individual healthcare plan.

Wherever possible children will be able to access their medication for self-medication quickly and easily; these will be stored in the cupboard by the office to ensure that the safeguarding of other children is not compromised. Platt CE Primary School does also recognise that children who take their medicines themselves and/or manage procedures may require an appropriate level of supervision. If it is not appropriate for a child to self-manage, then relevant staff will help to administer medicines and manage procedures for them.

If a child refuses to take medicine or carry out a necessary procedure, staff should not force them to do so, but follow the procedure agreed in the individual healthcare plan. Parents will be informed so that alternative options can be considered.

Managing medicines on school premises and record keeping

At Platt CE Primary School the following procedures are to be followed:

- Medicines should only be administered at school when it would be detrimental to a child's health or school attendance not to do so;

- No child under 16 should be given prescription or non-prescription medicines without their parents written consent (see Form B) - except in exceptional circumstances where the medicine has been prescribed to the child without the knowledge of the parents. In such cases, every effort should be made to encourage the child or young person to involve their parents while respecting their right to confidentiality. We would expect such situations to be exceptional in the primary school environment and may trigger further examination of the circumstances if this is considered in the child's best interests.
- With parental written consent we will administer non-prescription medicines (this needs to be provided by the parent in its original container and must be age appropriate) except aspirin or medicines containing aspirin except when prescribed by a doctor. Medication, e.g. for pain relief, should never be administered without first checking maximum dosage and when previous dose was taken. Parents should be informed.
- Where clinically possible, medicines should be prescribed in dose frequencies, which enable them to be taken outside school hours.
- Platt CE Primary School will only accept prescribed medicines, with written permission from parent/carer that are in-date, labelled, provided in the original container as dispensed by a pharmacist and include instructions for administration, dosage and storage. The exception to this is Insulin, which must be in-date, but will generally be available to schools inside an Insulin pen or a pump, rather than its original container.
- Medicines where appropriate will be stored safely in the locked cupboard outside of the school office door. Children should know where their medicines are at all times and be able to access them immediately. Where relevant, they should know who holds the key to the storage facility, Mrs Hallett.
- Medicines and devices such as asthma inhalers, blood glucose testing meters and adrenaline pens should be always readily available and not locked away. Asthma inhalers should be marked with the child's name - these should be kept in the bright orange bag in the child's classroom with a spare one kept in the office. Adrenaline pens are kept in the class first aid bag and a spare in the cupboard by the office.
- During school trips, the first aid trained member of staff will carry all medical devices and medicines required.
- A child who has been prescribed a controlled drug may legally have it in their possession if they are competent to do so, but passing it to another child for use is an offence. Monitoring arrangements may be necessary. Otherwise, we will keep all controlled drugs that have been prescribed for a pupil securely stored in a non-portable container and only named staff will have access. Controlled drugs should be easily accessible in an emergency. A record should be kept of any doses used and the amount of the controlled drug held in the school.

Staff administering medicines should do so in accordance with the prescriber's instructions. Platt CE Primary School will keep a record (see Forms C and D) of all medicines administered to individual children, stating what, how and how much was administered, when and by whom. Any side effects of the medication to be administered at school should be noted. Written records are kept of all medicines administered to children. These records offer protection to staff and children and provide evidence that agreed procedures have been followed.

- When no longer required, medicines should be returned to the parent/carer to arrange safe disposal. Sharps boxes should always be used for the disposal of needles and other sharps.

Emergency procedures

The Headteacher will ensure that arrangements are in place for dealing with emergencies for all school activities wherever they take place, including school trips within and outside the UK, as part of the general risk management process.

Where a child has an individual healthcare plan, this should clearly define what constitutes an emergency and explain what to do, including ensuring that all relevant staff are aware of emergency symptoms and procedures. Other pupils in the school should know what to do in general terms, such as informing a teacher immediately if they think help is needed.

If a child needs to be taken to hospital, staff should stay with the child until the parent arrives, or accompany a child taken to hospital by ambulance. Schools need to ensure they understand the local emergency services cover arrangements and that the correct information is provided for navigation systems.

Day trips, residential visits, and sporting activities

We will actively support pupils with medical conditions to participate in day trips, residential visits and sporting activities by being flexible and making reasonable adjustments unless there is evidence from a clinician such as a GP that this is not possible.

We will always conduct a risk assessment so that planning arrangements take account of any steps needed to ensure that pupils with medical conditions can be included safely. This will involve consultation with parents/carers and relevant healthcare professions and will be informed by Health and Safety Executive (HSE) guidance on school trips.

Other issues for consideration

Where a pupil uses home-to-school transport arranged by the LA and they also have a medical condition which is life-threatening, we will share the pupil's individual healthcare plan with the local authority.

Unacceptable practice

Although staff at Platt CE Primary School should use their discretion and judge each case on its merit with reference to the child's individual healthcare plan, it is not generally acceptable practice to:

- Prevent children from easily accessing their inhalers and medication and administering their medication when and where necessary;
- Assume that every child with the same condition requires the same treatment;
- Ignore the views of the child or their parents\carers; or ignore medical evidence or opinion (although this may be challenged);
- Send children with medical conditions home frequently or prevent them from staying for normal school activities, including lunch, unless this is specified in their individual healthcare plans;
- If the child becomes ill, send them to the school office or medical room unaccompanied or without someone suitable;
- Penalise children for their attendance record if their absences are related to their medical condition, e.g. hospital appointments;
- Prevent pupils from drinking, eating or taking toilet breaks whenever they need to in order to manage their medical condition effectively;
- Require parents/carers, or otherwise make them feel obliged, to attend school to administer medication or provide medical support to their child, including with toileting issues. No parent should have to give up working because the school is failing to support their child's medical needs; or
- Prevent children from participating, or creating unnecessary barriers to children participating in any aspect of school life, including school trips, e.g. by requiring parents to accompany the child.

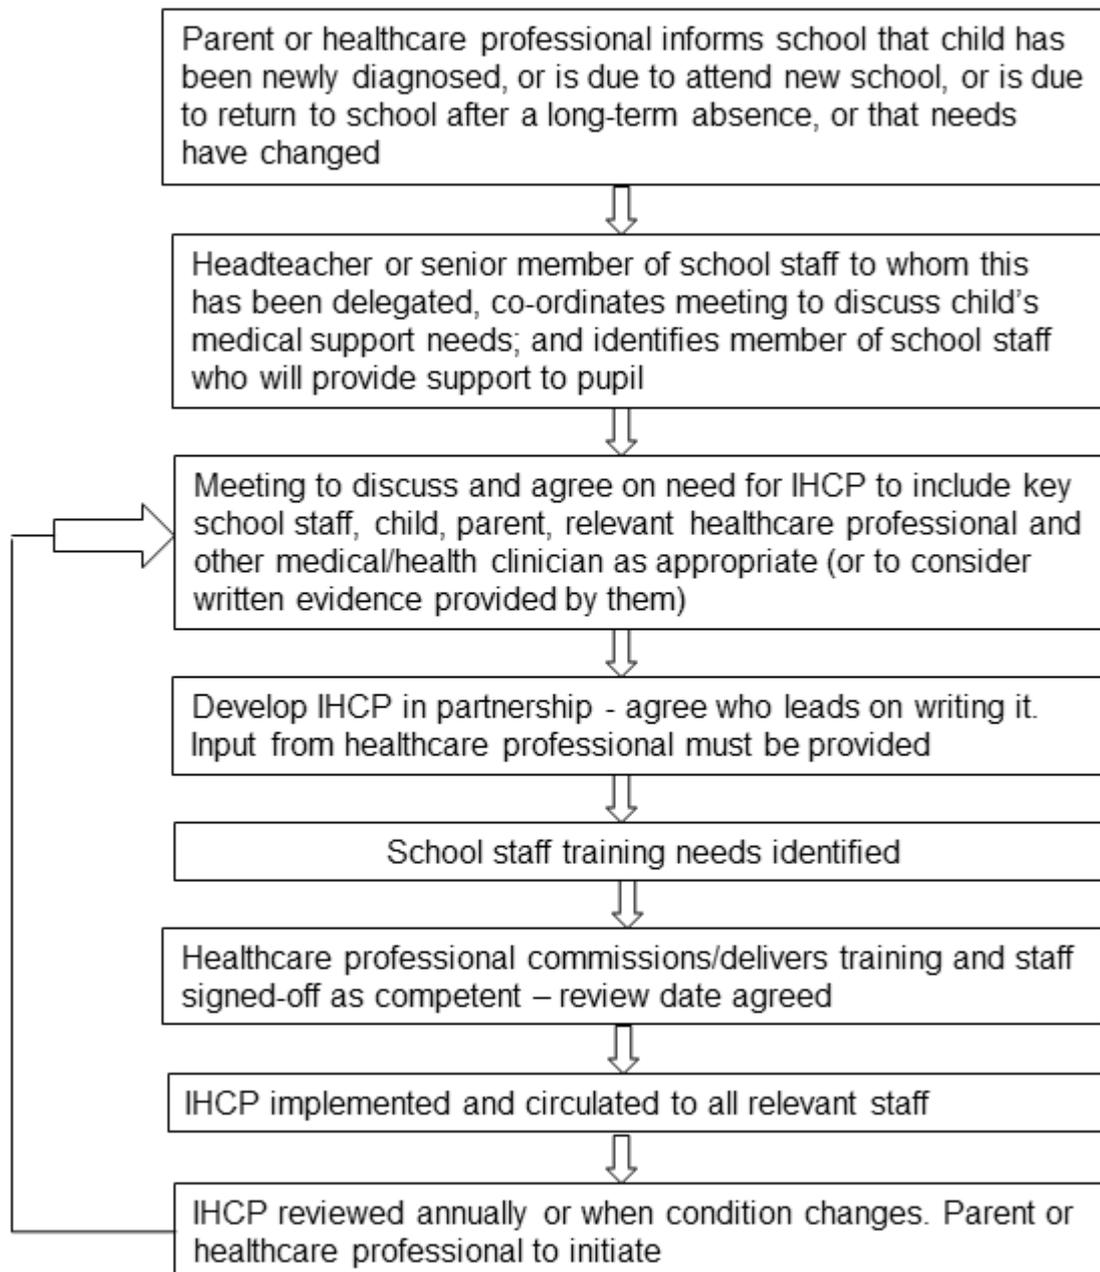

Liability and indemnity

Provided through Kent County Council.

Complaints

Should parents\carers be unhappy with any aspect of their child's care at Platt CE Primary School, they must discuss their concerns with the school. This will be with the child's class teacher in the first instance, with whom any issues should be addressed. If this does not resolve the problem or allay the concern, the problem should be brought to a member of leadership team, who will, where necessary, bring concerns to the attention of the Headteacher. In the unlikely event of this not resolving the issue, the parent\carer must make a formal complaint using the Platt CE Primary School Complaints Procedure.

Intimate Care

'Intimate care may be defined as an activity required to meet the personal care needs of each individual child in partnership with the parent, carer and the child.' (9.26, ACPC Regional Policy and Procedures). In school this may occur on a regular basis or during a one-off incident.

Platt CE Primary School is committed to ensuring that all staff responsible for the intimate care of children will undertake their duties in a professional manner at all times. We recognise that there is a need to treat all our children with respect when intimate care is given. No child should be attended to in a way that causes distress or pain and adults and staff must be sensitive to each child's individual needs.

Intimate care is any care which involves one of the following:

1. Assisting a child to **change his/her clothes**
2. **Changing or washing a child** who has soiled him / herself
3. Assisting with **toileting** issues
4. Supervising a child involved in **intimate self-care**
5. Providing **first aid** assistance
6. **Providing comfort** to an upset or distressed child
7. **Feeding** a child
8. Providing **oral care** to a child
9. Assisting a child who requires a specific **medical procedure** and who is not able to carry this out unaided.*

* In the case of a specific procedure only a person suitably trained and assessed as competent should undertake the procedure, (e.g. the administration of rectal diazepam.) Parents have the responsibility to advise the school of any known intimate care needs relating to their child in order that risk assessments can be put in place.

Principles of Intimate Care

The following are the fundamental principles of intimate care upon which our policy guidelines are based:

- Every child has a right to be safe;
- Every child has the right to personal privacy;
- Every child has the right to be valued as an individual;
- Every child has the right to be treated with dignity and respect;
- All children have the right to be involved and consulted in their own intimate care to the best of their abilities;
- All children have the right to express their views on their own intimate care and to have their views taken into account; and
- Every child has the right to have levels of intimate care that are appropriate and consistent.

Assisting a child to change his / her clothes

On occasions an individual child may require some assistance with changing if, for example, he / she has an accident at the toilet, gets wet outside, or has vomit on his / her clothes etc.

Staff will always encourage children to attempt undressing and dressing unaided. However, if assistance is required this will be given.

Staff will always ensure that they have a colleague in attendance when supporting dressing/undressing and will always give the child the opportunity to change in private, unless the child is in such distress that it is not possible to do so. If staff are concerned in any way parents will be sent for and asked to assist their child and informed if the child becomes distressed.

Changing a child who has soiled him/herself

If a child soils him/herself in school a professional judgement has to be made whether it is appropriate to change the child in school, or request the parent/carer to collect the child for changing. In either circumstance the child's needs are paramount and he/she should be comforted and reassured throughout.

The following guidelines outline our procedures but we will also seek to make age-appropriate responses.

- The child will be given the opportunity to change his / her underwear in private and carry out this process themselves.
- School will have a supply of wipes, clean underwear and spare uniform for this purpose.
- If a child is not able to complete this task unaided, school staff will attempt to contact the emergency contact to inform them of the situation.
- If the emergency contact is able to come to school within an appropriate time frame, the child will be accompanied and supported by a staff member until they arrive. This avoids any further distress and preserves dignity.
- If the emergency contact cannot attend, school will seek verbal permission for staff to change the child. If none of the contacts can be reached the Headteacher is to be consulted and the decision taken on the basis of loco-parentis and our duty of care to meet the needs of the child.
- The member of Staff who has assisted a pupil with intimate care will complete a record of this.

*Should there be repeated incidents of soiling an individual toilet plan may be put in place.

Child Protection/Safeguarding Guidelines

- Ensure that the action you are taking is necessary. Get verbal agreement to proceed.

CARE – CONCERN – COMMUNICATE.

Pastoral Care Procedures

- Ensure the child is happy with who is changing him / her.
- Be responsive to any distress shown.

Basic hygiene routines

- Always wear protective disposable gloves.
- Seal any soiled clothing in a plastic bag for return to parents.

In the case of Foundation Stage children and in particular a Primary child, in order to avoid any unnecessary distress, a member of staff may assist the child, with a colleague in attendance, unless a parent has requested otherwise or if the child is reluctant. Parents will be contacted as soon as it is practical to do so.

3. Providing comfort or support to a child:

There are situations and circumstances where children seek physical comfort from staff. Where this happens staff need to be aware that any physical contact must be kept to a minimum. When comforting a child or giving reassurance, staff must ensure that at no time can the act be considered intimate. If physical contact is deemed to be appropriate, staff must provide care which is professionally appropriate to the age and context.

If a child touches a member of staff in a way that makes him/her feel uncomfortable this can be gently but firmly discouraged in a way which communicates that the touch, rather than the child, is unacceptable. If a child touches a member of staff, as noted above, this should be discussed, in confidence with the Designated Safeguarding Leader.

4. Assisting a child who requires a specific medical procedure and who is not able to carry this out unaided.

Our Administration of Medications Policy outlines arrangements for the management of the majority of medications in school.

Parental permission must be given before any medication is dispensed in school- this form is also available on our website.

A small number of children will have significant medical needs and in addition to the arrangements included in our Administration of Medications Policy will have an Individual 'Care Plan'. This Care Plan will be formulated by the relevant medical body. If required, school staff will receive appropriate training.

Swimming

Some of our classes participate in a swimming programme at Borough Green Primary or Larkfield Leisure Centre. Children are entitled to respect and privacy when changing their clothes however, there must be the required level of supervision to safeguard young people with regard to health and safety considerations and to ensure that bullying, teasing or other unacceptable behaviour does not occur.

Changing rooms are used at Larkfield Leisure Centre and Borough Green Primary. This supports effective and discrete supervision and privacy for our children when changing. Where a child needs additional support for changing parental permission will be sought and a personal care plan will be drawn up so as to maintain dignity but increase independence.

Residential Trips

Residential educational visits are an important part of our Year 6 school experience. Particular care is required when supervising pupils in this less formal setting.

As with Extra-Curricular Activities, although more informal relationships in such circumstances tend to be usual, staff are still guided by our Child Protection procedures, Pastoral Care and Positive Behaviour Policies. Some specific Intimate Care issues may arise in a Residential context.

Showering

Children are entitled to respect and privacy when changing their clothes or taking a shower. However, there must be the required level of supervision to safeguard young people with regard to health and safety considerations, and to ensure that bullying, teasing or other unacceptable behaviour does not occur.

This means that staff should announce their intention of entering changing rooms, avoid remaining in changing rooms unless pupil needs require it, avoid any physical contact when children are in a state of undress and avoid any visually intrusive behaviour.

Given the vulnerabilities of the situation, it is strongly recommended that when supervising children in a state of undress, another member of staff is present. However, this may not always be possible and therefore Staff need to be vigilant about their own conduct, e.g. adults must not change in the same place as children or shower with children.

It is best practice in our school that when an incident has taken place that has necessitated a member of staff to be present when children are changing that an incident report is made.

Night Time Routines

It is established practice that the children's bedrooms are private spaces and anyone else wanting to enter the room should knock and announce their intention to enter.

At bedtime, children are given a set amount of time to change and prepare for bed and will be told when the supervising teachers will visit the rooms to check all is okay and switch off the lights. A reciprocal arrangement is in place in the mornings.

There are occasions when incidents take place during the night and the need arises to:

1. Assist a child to **change his / her clothes**
2. **Change a child** who has soiled him / herself
3. **Provide comfort** to an upset or distressed child
4. Assist a child who requires a specific **medical procedure** and who is not able to carry this out unaided.

Guidance as above will be followed with the support of an additional member of staff in attendance.

School Responsibilities

All members of staff working with children are vetted by the Education Authority (DBS). This includes students on work placement and volunteers who may be left alone with children. Vetting includes criminal record checks and two references.

Only those members of staff who are familiar with the intimate care policy and other Pastoral Care Policies of the school are involved in the intimate care of children.

Where anticipated, intimate care arrangements are agreed between the school and parents and, when appropriate and possible, by the child. Intimate care consent forms are signed by the parent and stored in the child's file. **Only in emergency would staff undertake any aspect of intimate care that has not been agreed by parents and school.** Parents would then be contacted immediately.

The views of all relevant parties should be sought and considered to inform future arrangements.

If a staff member has concerns about a colleague's intimate care practice he or she must report this to the Designated Safeguarding Lead.

Guidelines For Good Practice

All children have the right to be safe and to be treated with dignity and respect. These guidelines are designed to safeguard children and staff. They apply to every member of staff involved with the intimate care of children.

Young children and children with special educational needs can be especially vulnerable. Staff involved with their intimate care need to be particularly sensitive to their individual needs.

Members of staff also need to be aware that some adults may use intimate care, as an opportunity to abuse children. It is important to bear in mind that some forms of assistance can be open to misinterpretation. Adhering to the following guidelines of good practice should safeguard both children and staff.

1. **Involve the child in the intimate care.** Try to encourage a child's independence as far as possible in his or her intimate care. Where a situation renders a child fully dependent, talk about what is going to be done and, where possible, give choices. Check your practice by asking the child or parent about any preferences while carrying out the intimate care.
2. **Treat every child with dignity and respect and ensure privacy appropriate to the child's age and situation.** Care should not be carried out by a member of staff working alone with a child.
3. **Make sure practice in intimate care is consistent.** As a child may have multiple carers a consistent approach to care is essential. Effective communication between all parties ensures that practice is consistent.

4. **Be aware of your own limitations.** Only carry out activities you understand and feel competent with. If in doubt, ask. Some procedures must only be carried out by members of staff who have been formally trained and assessed.
5. **Promote positive self-esteem and body image.** Confident, self-assured children who feel their bodies belong to them are less vulnerable to sexual abuse. The approach you take to intimate care can convey lots of messages to a child about their body worth. Your attitude to a child's intimate care is important. Keeping in mind the child's age, routine care can be both efficient and relaxed.
6. **If you have any concerns you must report them.** If you observe any unusual markings, discolouration or swelling report it immediately to the Designated Teacher for Child Protection.
7. If a child is accidentally hurt during intimate care or misunderstands or misinterprets something, reassure the child, ensure their safety and report the incident immediately to the designated teacher. Report and record any unusual emotional or behavioural response by the child. A written record of concerns must be made available to parents and kept in the child's personal file.

Working with Children of the Opposite Sex

There is positive value in both male and female staff being involved with children. Ideally, every child should have the choice for intimate care but the current ratio of female to male staff means that assistance will more often be given by a woman. The intimate care of boys and girls can be carried out by a member of staff of the opposite sex with the following provisions:

- When intimate care is being carried out, all children have the right to dignity and privacy, i.e. they should be appropriately covered, the door closed or screens/curtains put in place;
- If the child appears distressed or uncomfortable when personal tasks are being carried out, the care should stop immediately. Try to ascertain why the child is distressed and provide reassurance;
- Report any concerns to the Designated Safeguarding Lead and make a written record;
- Parents must be informed about any concerns.

Communication with Children

It is the responsibility of all staff caring for a child to ensure that they are aware of the child's method and level of communication. Depending on their maturity and levels of stress children may communicate using different methods - words, signs, symbols, body movements, eye pointing, etc. To ensure effective communication:

- Make eye contact at the child's level;
- Use simple language and repeat if necessary;
- Wait for response;
- Continue to explain to the child what is happening even if there is no response; and
- Treat the child as an individual with dignity and respect.

Platt C.E Primary School

Intimate Care Agreement

In order to best meet the needs of your children when they are with us we would like to set up an individual agreement between parents and the school with regard to intimate care.

Intimate care is any care which involves washing, touching or carrying out an invasive procedure which are children are unable to do for themselves arising from the child's stage of development.

Intimate care may involve helping with drinking, eating, dressing, toileting, or comforting. In most cases at school intimate care will involve procedures to do with personal hygiene.

Staff at Platt CE Primary School that are providing intimate care are aware of the need to adhere to good Child Protection practice in order to minimise the risks for both the children and themselves. All school staff are supported and trained so that they feel confident in their practice.

- We give permission to the school to provide appropriate intimate care support to my child e.g. changing soiled clothing, washing and toileting.
- We understand that this will generally be carried out by _____ * but may also be carried out by another member of staff if these named staff members are unavailable.
- We have discussed with my child's class teacher the approach that I would like them to take for this the details are outlined in the additional information.
- We will advise the Headteacher of any medical complaint my child may have which affects issues of intimate care.
